

Socket Programming Assignment Report

Java Socket Programming Process

Supervisor: Mr.Akash Tharuka

Chatting system using TCP/UDP Sockets

Course: CSCI 21023 - Data Communication and Networks (2023/2024)

Date: 19/11/2025

B.Sc. (Honours) in Computer Science

Programming Language: Python

GitHub repository URL : <https://github.com/Harshani0117/socket-programming.git>

1. Group Members and Roles

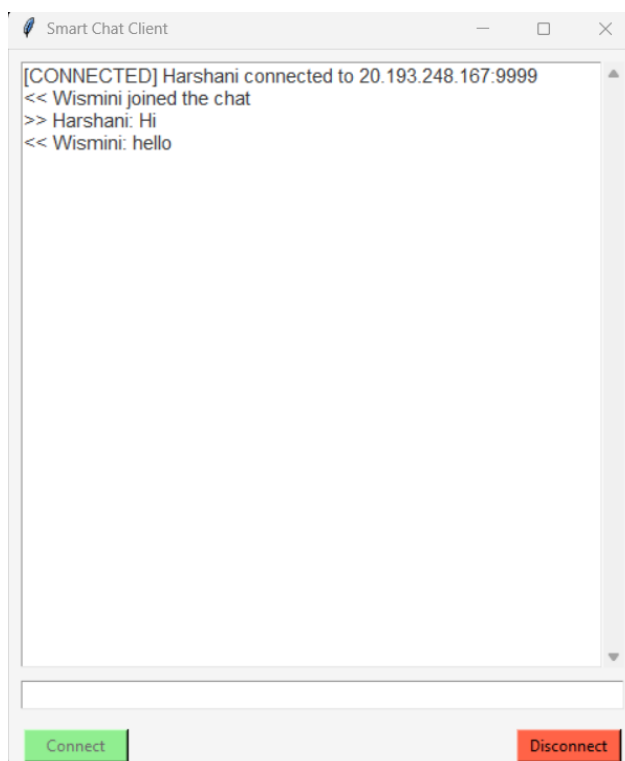

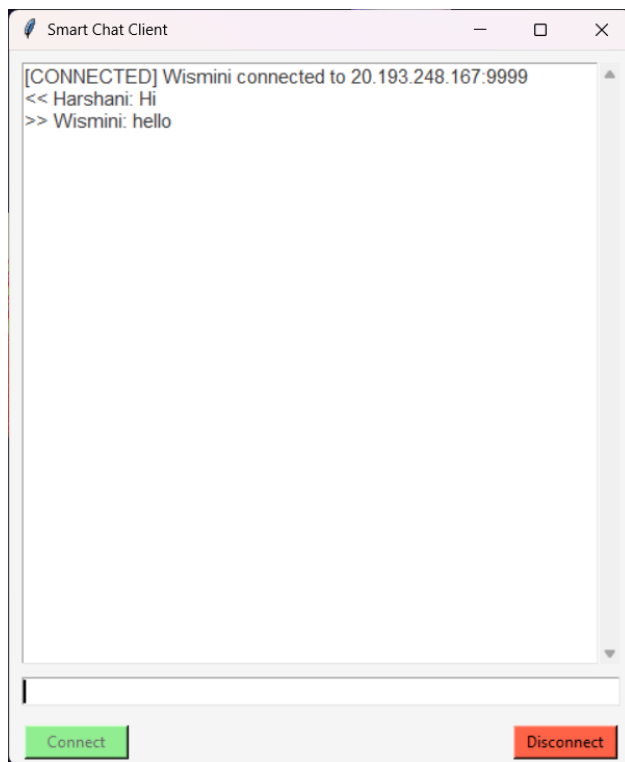

Members	What They Did
CS/2022/005	❖ Set up Azure VM
CS/2022/031	❖ Test everything works
CS/2022/034	❖ Write client.py
CS/2022/054	❖ Write server.py

2. System Setup and Configuration

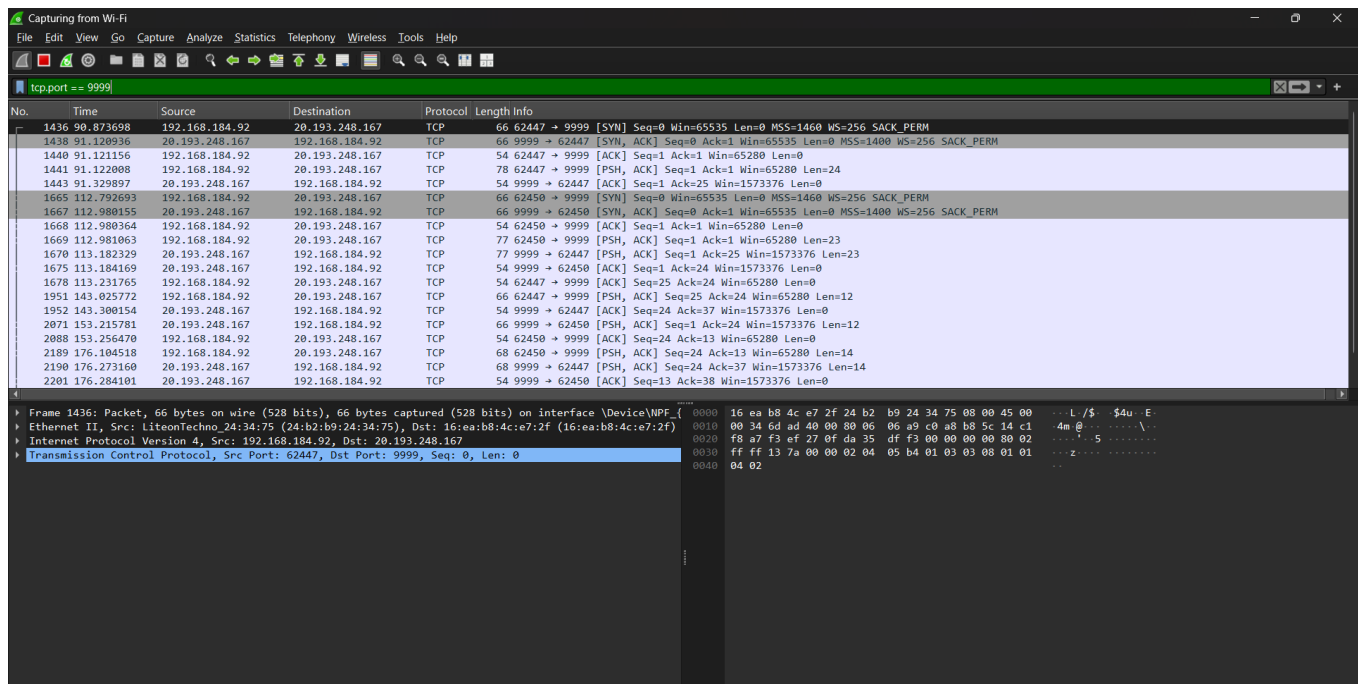

Component	Specification
Cloud Server	Azure VM, Windows, Standard D2ls v5 (2 vcpus, 4 GiB memory)
Public IP	20.193.248.167 (Static), Port: 9999 (TCP)
Host 1	Windows 11, Role: Client 1
Host 2	Windows 11, Role: Client 2
Network Security	Azure NSG: Allow TCP 9999 inbound from Any
Protocol	TCP ,Header: 64 bytes, UTF-8 encoding

Client to client pass message

Passing message

Server Interface
